

RCBS Pro Melt Assembly Instructions

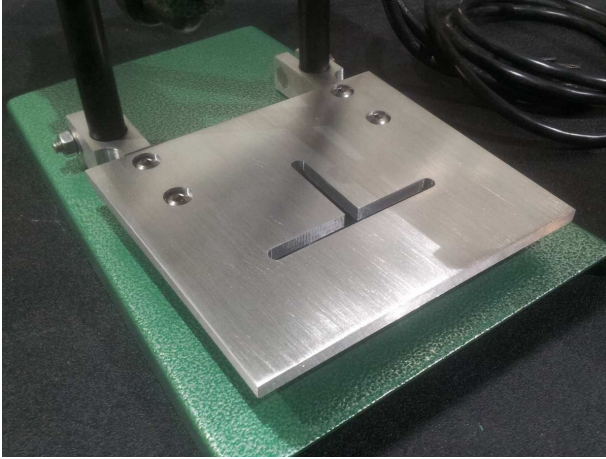

Remove the nuts holding the base on.

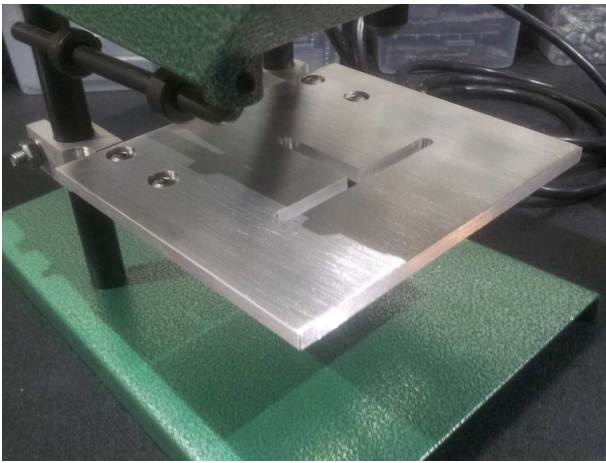

Add the shelf brackets as shown in the image with the nuts to the outside. Leave them loose.

Re-attach the base and stand unit up with the shelf supports still loose.

Add shelf to shelf supports with the $\frac{1}{4}$ x 20 button head bolts. Leave the bolts loose so they can move some as you raise the shelf up.

Raise the shelf up a couple of inches and tighten the $\frac{1}{4}$ nuts on the shelf supports. After the shelf supports are tightened you can tighten the shelf down to the shelf supports.

Done!!
